

Overfitting pretraitements : C20.0 (Iter 9)

R²_p = -0.200
RMSEP = 0.107
RPD = 0.928
n_{ech} = 30

A scatter plot showing the relationship between predicted values (Valeurs predites) on the x-axis and measured values (Valeurs mesurées) on the y-axis. The plot includes a dashed red line representing the identity line (y=x) and a solid blue line representing the linear regression. The data points are represented by open circles. The plot is set against a light gray background with white grid lines. The x-axis ranges from 0.2 to 0.6, and the y-axis ranges from 0.2 to 0.6. The regression line is nearly horizontal, indicating a weak correlation, which is consistent with the R²_p value of -0.200.
